Losses on Sugar Were About a Point Steamer Sails Direct Until Next Thursday-Grain Markets.

New York, May 4.—The stock market maintained its narrow and professional character today. As though to vary the appearance of recent monotony the upward movement was continued today instead of starting in the opposite direction. But this was hardly more than a device of the small traders to give an appearance of strength to the market and their realizing sales before the close brought prices back to last night's level and but changes insignificant except in a few usually active stores.

to last hight's level and Eat changes insign's cant except in a few usually active stores.

Sugar retained its relative prominence through a decreased volume of dealings. It was lifted above yesterday's close once or twice with difficulty and the losses were about a point for the day. Long Island rang off 3½, seemingly on realizing on the signing by the governor of the bill authorizing the construction of a bridge at Hell Gate, but late dealings in the stock secured a rapid recovery of 4½ points. The steel stocks showed some rather languid evidence of positive strength without any particular news to account for it beyond the published opinion of the president of one of the companies, arguing that the present low stocks in the yards and the impossibility of competition from Europe insures against any considerable reaction in prices. The strength of the London market helped the opening advance here, but London sold moderately on the advance. Sterling exchange was slightly firmer again today, in spite of slightly easier money in London. But the present money movement is towards Paris, and as no stemer sails direct to France until next Thursday there were no exchange bills offered for sale against gold export. The bond market was dull, but prices were well held. Total sales, par value, \$2.375,000. United States 3s coupon advanced ½; 3s registered ½, and new and old 4s ¼ in the id price.

Marquis Ito Believes That the Empire is Lost.

NOTHING CAN SAVE IT

DAY OF THE GREAT LI HUNG CHANG HAS PASSED.

The empire will be the scene of another notable spectacle on the occasion of the wedding of the prince imperial which is now fixed for the 6th of May. Every town and village will participate and from every one contributions have for a long time been coming in as expressions of the loyalty and love of the inhabitants. of the inhabitants.

An entirely new feature of these gifts has been the almost universal desire on the part of the donors that they take the form of benefactions for the public use, a desire which has been countenanced and stimulated by the prince himself and by the public authorities. As a result innumerable public institutions in the shape of libraries, schools, monuments, parks, etc., will be established throughout the length and breadth of the empire. This is notable as an entirely new development of Japanese life as public

spirit has heretofore been almost entirely lacking. In this regard it is entirely possible that the recent accounts of public benefactions by wealthy individuals in America, have had an effect here in the far off Orient. They have certainly here widely executed the second of the control of They have certainly been widely com-mented upon by the press and have attracted great attention.

### In National Politics.

In national politics since the adjournment of the diet there has been little to note, save the spasmodic attempts of the liberal party to obtain cabinet portfolios in return for the support given by it to government measures, at he late session, its manifest purpose being to break down the civil service rules to this end. It is the intention of the government to preserve its integrity, and it is therefore a matter of great satisfaction that there has not rules to this end. It is the intention of the government to preserve its integrity, and it is therefore a matter of great satisfaction that there has not been and is not likely to be any yielding to the demands of the spoilsmen. With the entire subsidence of the immediate war scare, the Japanese press and people are busy speculating upon possible reasons for the frequency and persistency of Russia's "demands" on Korea. These demands are constantly checkmated by Japan and yet it is noted that somehow Russia always comes out of the diplomatic strife a bit ahead with some slight concession made to her for her compliance in receding from her initial claims.

In the most recent instance starting with her usual improssible demand her

In the most recent instance starting final compromise is the obtaining from Korea a guarantee that no part of the island of Koche shall be alienated at any time in the future. It is noted the terms of this guarantee are identical with those by which the Langtse valley became England's acknowledged "sphere of influence" so that Russia now has gained her point, has acknowledged sphere of influence in the straits of Korea, and has gained its coveted foot-hold for a naval station, where it can plant itself as a direct menace to Japan. cko:uG i8r sle- mjeJedc-sffido-i au Cnk

"A Penny Saved is a Penny Earned." Economy is the lesson taught by this saying. It is true economy to take Hood's Sarsaparilla at this season, be cause it purifies, enriches and vitalizes the blood, and thus prevents sickness and puts the whole system in a state of health for the coming season. Every bottle of Hood's Sarsaparilla contains 100 doses—positive proof that it is economy to take only Hood's.

Constipation is cured by Hood's Pills.
